

9. Code of Ethics

In accordance with the Regulation on Digital Asset Service Providers of the CNAD, DASPs must publish guidelines that guide the transparency of their organizational conduct:

- **Institutional Values:** EXCHANGE TECHNOLOGIES, S.A. DE C.V. governs its activities under strict ethical parameters consolidated through a solid track record (20+ years of its team's experience in traditional financial markets and 10+ years in the DeFi ecosystem).
- **Prevention of Conflict of Interest and Market Abuse:** The guidelines of the code impose strict confidentiality in the handling of users' commercial information and absolutely prohibit the use of privileged (insider) information by administrators and employees for their own benefit or that of third parties (Art. 24 RPSAD).
- **Corporate Governance:** It promotes transparency, the proper traceability of each operation executed by its trading engines, and the implementation of robust internal control systems to prevent reputational risks and avoid unnecessary litigation.
